

SHERPA TABLES

Manufactured to very high quality using aluminium frame, legs and chequer plate construction, our tables stand up to daily use in harsh environments and are both tough and very lightweight.

Our Sherpa tables are great to use outdoors at home and when camping. Their metal construction makes them ideal bases for pizza ovens (no risk of melting) and they will serve you well for years to come, as well as being a talking point for those that use them.

These tables stow away flat with a profile of just 30mm as the legs fold away under the frame, which is great for storage in the garage or the car.

Dimensions

L1175 x W750 x H30mm
(H770mm opened)

Weight

Approx. 10kg
